##### Welcome to Getting Started in MyLO

Hello Merry,

Welcome to the new MyLO. This unit has been designed to give you an overview of the system; its navigation and some instructions on how to customise the system to your preferences.

This unit can be completed by any new user to MyLO and we recommend it as a good introduction to the new system.

To get started with this unit please view the content by clicking here: [Content](#).

Please note that this unit will be updated as more resources become available.

Regards,

The MyLO Support Team.

### Welcome to Online Learning

Getting Started in MyLO is available once you have logged on with your UTAS username and password. You will be shown how to do this in your Student Orientation session.

You will find a comprehensive list of MyLO learning resources, how to use MyLO and even videos to guide you in your first attempt.

Your Unit materials, important additional information, and submission of assignments – just a few reasons why you should learn how to use this resource well and check it on a daily basis.
