SERVICE DESK

MyPassword

[UTAS Home](#) > [Service Desk](#) > MyPassword

We're updating our password process to make your information more safe and secure in accordance with **Australian Signals Directorate**, Information Security Controls. You'll be asked to change your password every 90 days. This portal will help you successfully update your password and devices quickly.

Change Password: This process will take about ten minutes, so make sure you've got enough time. Have all your mobile devices used to access your account available so you can change them at the same time. Your account will be locked if you do not update all of your devices at the same time.

[Change Password](#)

Forgotten Password Registration: You can opt-in to self-service password recovery by completing the registration process. This allows you to reset your password, if you've forgotten it.
